The screenshot shows the configuration screen for a Wi-Fi network named 'yuntech-802.1X'. The security type is set to '802.1x EAP'. The '身分' (Identity) field contains 'account' and is marked with a red box and '(1)'. The '密碼' (Password) field is filled with dots and is marked with a red box and '(2)'. Below the password field are two options: '顯示密碼' (Show password) with an unchecked radio button, and '顯示進階選項' (Show advanced options) with a checked radio button. The 'EAP 方法' (EAP method) dropdown is set to 'PEAP' and is marked with a red box and '(3)'. The '階段 2 驗證' (Phase 2 authentication) dropdown is set to 'GTC' and is marked with a red box and '(4)'. The 'CA 憑證' (CA certificate) is set to '(未指定)'. At the bottom, there are two buttons: '取消' (Cancel) and '儲存' (Save), with the '儲存' button marked with a red box and '(5)'.

3.完成連線
